

Valves
our world, your projects

Coyard is organised on a human scale and has a strong technical ethos built up since 1926. It benefits from a dedicated forge and foundry plant within the group and offers specially adapted products designed to transport all types of fluids whatever the temperature and whatever the pressure.

In 1998, COYARD Company joined the FINANCIERE MB Group made up of the companies

- COYARD
- SACCAP
- SACCAP SERVICE SCOFLEX
- SMFO

COYARD has greatly benefited from this association and is now able to provide its customers with a complete range of industrial valves and fittings.

Coyard and FF (Flash Forge) have formed the Joint Venture FF Coyard to manufacture and market custom valves, from France as well as from our manufacturing facility in India. We offer our customers a wide and complete range of valves, with exceptional customization options, traceability, design capabilities, and specialty alloys from our own Casting and Forging facility.

Design Office

3d design software and finite element analysis software

From design to manufacture,
COYARD has cutting edge
development, machining, assembly
inspection and testing resources.

- Machining centres
- Qualified welders
- Water and HP air test benches
- Cryogenic test facilities
- A fire test bench
- X-ray examination
- Dye penetrant test equipment, US, PMI, etc.

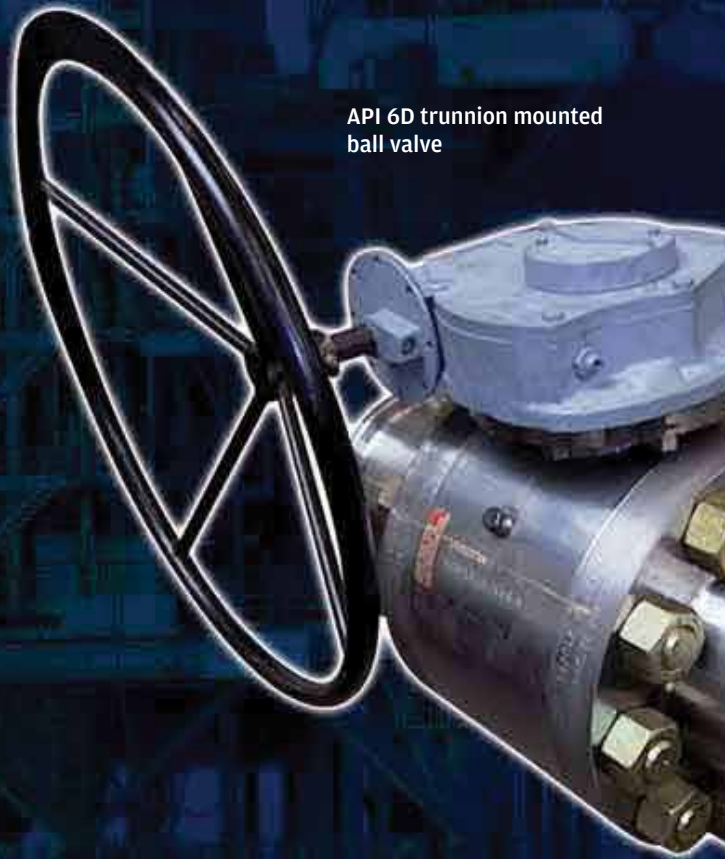

Top Entry ball valve

Actuated cryogenic ball valve

API 6D trunnion mounted ball valve

Ball valves

COYARD offers a complete range of ball valved from 2" to 32", class 150 to 2500, API 5000 and 10000.

Specific types

- Metal-Metal Seated
- Double piston effect Seats
- Double block and bleed
- All welded valved
- Rising stem valves
- Cryogenic and high temperature applications
- Special alloys

Our design office is able to meet any specific requests that you may have, or to incorporate the different features listed above in order to respond to your most exacting requirements.

Rising stem ball valve

Double block and bleed ball valve

Through conduit gate valve

Pressure seal bonnet valve

Cryogenic gate valve

Globe valve

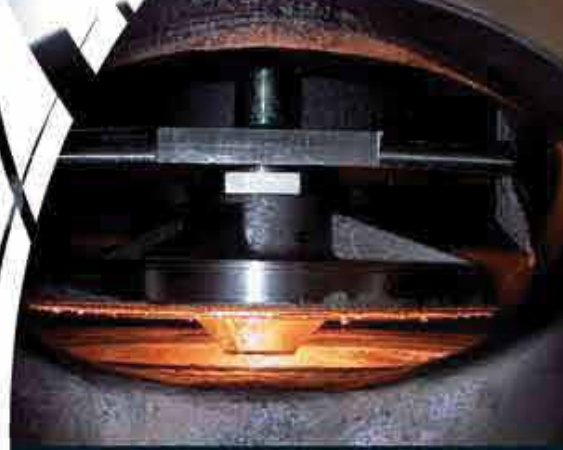

COYARD also has a wide range of **Cast Products** flexible throat cross-section valves, gate valves, globe valves, non-return valves from 2" to 32" in all pressure classes.

Special types

- Tungsten Carbide coated components
- Stainless steel, hastelloy, coating, etc.
- Pressure seal bonnets
- Cryogenic applications
- Heating capsules
- Fugitive emissions

We are able to meet any specific requests that you may have or to incorporate these different features in order to meet your most exacting requirements.

Gate valve

Dual check valve
